WHY CHOOSE NATIVE PLANTS?

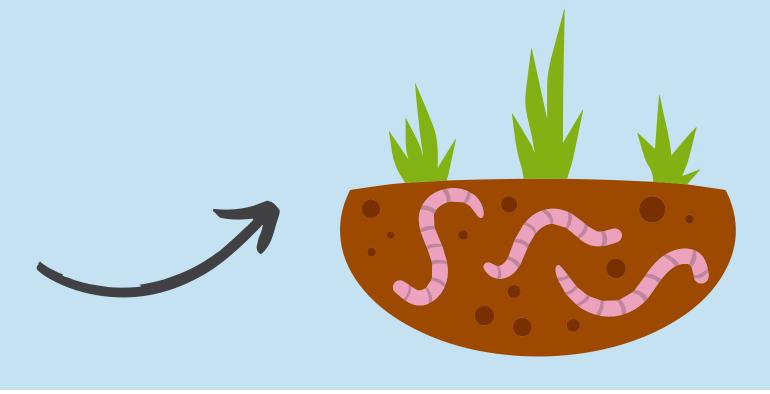

support wildlife

native plants provide shelter and food for everything from bugs to bears, and are essential for the survival of many threatened species

help soil

native plants have deep root systems that prevent erosion, capture nutrients, and support important soil microbes

adapted to survive

native plants are adapted to local soils and climate, which can challenge non-native plants

low maintenance

native plants need less water, don't need to be fertilized, and are resistant to pests and disease

Choose wisely.
Choose natives!
