

Bee Buddies Application

INSTRUCTIONS: If you would like to participate in the Bee Buddies Program, please complete the following application in full. Successful applicants will receive a stocked mason bee nesting box at the beginning of the bees' active season (mid-March to early April). To cover the cost of materials, we charge a \$30 participation fee, payable upon acceptance into program.

If your habitat seems to support our minimum placement criteria, we will contact you to schedule an installation visit. All applicants will be notified of their submission status by the date listed on the Bee Buddies webpage.

1. **Do you own ____ or rent ____.** If you rent, stop here. At this time we are only able to enroll applicants who own their property.
2. **Do you use herbicides, pesticides, or other chemicals in your yard, orchard, or garden?** Yes ____ No ____ **If you use chemicals, stop here.** Bees are in decline due in large part to exposure to pesticides. For this reason, Bee Buddies is only open to people who use pesticide-free, organic practices.
3. Mason bees will pollinate any blooming plants within a 200-300 ft. radius of their nest box from mid-March to late May. **Please indicate how many of the following plants are within 200-300 feet of what you think would be the most likely location for your nest box.** (Plants may be located off your property.)

- | | | |
|---|--------------------------------------|--|
| <input type="checkbox"/> Fruiting trees or shrubs | <input type="checkbox"/> Vine Maples | <input type="checkbox"/> Red Flowering Currant |
| <input type="checkbox"/> Willow | <input type="checkbox"/> Maple trees | <input type="checkbox"/> Indian Plum |
| <input type="checkbox"/> Oregon grape | <input type="checkbox"/> Blueberries | <input type="checkbox"/> Red-osier dogwood |

On the lines below, list any other plants you have that bloom mid-March to late May.

6. The female mason bee needs access to moist clay soil to build the chamber walls in the nesting hole. Check our website for how to provide mud.

Do you have or can you provide a source of mud for the bees? Yes _____ No _____

7. We prefer to install nesting boxes on stable existing structures. They need to face east and be at eye-level height. In the space provided below or as an attachment, include a google map or draw a rough sketch of your property indicating where your building(s) and fruit trees or native plants are and where you think the nest box should be installed. Indicate where any active bird feeders are located.

8. When are you available for us to install a bee nesting box? Check all that apply.
